

Interior Engineering, Design and Integration

AIM Aerospace has over thirty years of experience in the development and integration of aerospace interiors and products. AIM Aerospace Technical Services includes the following services:

- ▶ **Program Management**
- ▶ **Product Integration**
- ▶ **Product Development**
- ▶ **Product Substantiation**
- ▶ **Product Certification**
- ▶ **Technical Publications**

From concept...

To development...

Product Development	Product Substantiation	Certification Services	Technical Publications
Full Interiors	FEM/FEA	Over Ninety (90) STCs	Illustrated Parts Catalog
Monuments	Interface Loads Report	STC Project Management	Component Maintenance Manual
Lavatories	Displacements/Deformation Analysis	Design Data Reviews and Approvals	Wire Diagram Manual
Crew Rest	Detail Stress Reviews	Designated Engineering Representatives (DER's) All Disciplines	System Schematic Manual
Bin Modules	Stress Test Plan/Reports	Coordination of All Data Submittals and Conformity Inspections	Overhaul Manual
First Class Furniture	Dynamic Analysis	Parts Manufacturing Approval (PMA)	Airworthiness Instruction
Business Class Furniture	Decompression Analysis	FAA Repair Status	
Mechanical System Integration	Air Flow Analysis		
Electrical System Integration	Static Testing		
	Cyclic Testing		
	Flammability Testing
